1. What do you need?

- a UDOO X86 board
- a screwdriver and screws
- an ethernet cable
- a CPU fan
- a HDMI to HDMI cable
- UDOO bricks and UDOO blue headsets or speakers
- an external drive or a micro SD card
- a mini DP++ to HDMI cable

2. Mounting of the board

- Connect the UDOO bricks one after another.
- Screw the fan on top of the heat sink.
- Plug the fan into this connector.
- Plug the sata data cable.
- Plug your micro SD card.
- If you need internet connection, use the gigabit ethernet port.

You can now fully experience your X86!
